The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for North Dakota

- In 2007, the average scale score for eighth-grade students in North Dakota was 292. This was higher than their average score in 2005 (287) and was higher than their average score in 1990 (281).¹
- North Dakota's average score (292) in 2007 was higher than that of the nation's public schools (280).
- Of the 52 states and other jurisdictions that participated in the 2007 eighth-grade assessment, students' average scale score in North Dakota was higher than those in 47 jurisdictions, not significantly different from those in 3 jurisdictions, and lower than that in 1 jurisdiction.²
- The percentage of students in North Dakota who performed at or above the NAEP *Proficient* level was 41 percent in 2007. This percentage was greater than that in 2005 (35 percent) and was greater than that in 1990 (27 percent).
- The percentage of students in North Dakota who performed at or above the NAEP Basic level was 86 percent in 2007. This percentage was greater than that in 2005 (81 percent) and was greater than that in 1990 (75 percent).

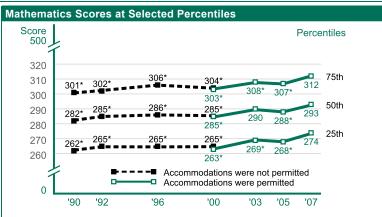

Percentages at NAEP Achievement Levels and Average Score North Dakota (public) Average Score 281* 1990a 48 1992^a 283* 26 3* 48 4* 284* 19968 29* 44 4* 2000a 46 27 283* 27* 282* 46 2000 19 287 45 31 2003 30* 287 2005 46 2007 45 292 Nation (public) 2007 39 280 24 Percent at Basic, Proficient, and Advanced Below Basic Basic Proficient Advanced

NOTE: The NAEP grade 8 mathematics achievement levels correspond to the following scale points: Below *Basic*, 261 or lower; *Basic*, 262–298; *Proficient*, 299–332; *Advanced*, 333 or above.

Performance of NAEP Reporting Groups in North Dakota: 2007						
	Percent	Average	Percent	nt Percent of students at or above		Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	50	293 ↑	14 ↓	86 ↑	43 ↑	8 ↑
Female	50	290 ↑	15	85	39 ↑	6
White	89	295 ↑	11 ↓	89 ↑	44 ↑	7 ↑
Black	1	‡	‡	‡	#	‡
Hispanic	1	‡	‡	‡	#	‡
Asian/Pacific Islander	1	‡	‡	‡	#	‡
American Indian/Alaska Native	8	264	44	56	14	1
Eligible for National School Lunch Program	26	280 ↑	27	73	29 ↑	4
Not eligible for National School Lunch Program	74 ↑	296 ↑	10	90 ↑	45 ↑	8

Average Score Gaps Between Selected Groups

- In 2007, male students in North Dakota had an average score that was higher than that of female students by 3 points. In 1990, the average score for male students was higher than that of female students by 6 points.
- Data are not reported for Black students in 2007, because reporting standards were not met. Therefore, the performance gap results are not reported.
- Data are not reported for Hispanic students in 2007, because reporting standards were not met. Therefore, the performance gap results are not reported.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 15 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 14 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 39 points. In 1990, the score gap between students at the 75th percentile and students at the 25th percentile was 38 points.

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

- # Rounds to zero.
 * Significantly different from 2007.
- Reporting standards not met.
- ↑ Significantly higher than 2005. ↓ Significantly lower than 2005.
- ¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in North Dakota were 6 percent and "percentage rounds to zero" in 2007, respectively.For more intormation on NAEP significance testing see http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical.
- ² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.
- NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
